CONFIDENTIAL

NCBS 2024FY Executive Summary

NCBS Study Description

FOR INTERNAL USE ONLY

The results of this study are for internal use only and may not be published under any circumstances. This applies to advertising, PR activities etc.
Under no circumstances may this data be used in academic dissertations and theses.

NEW CAR BUYERS STUDY (NCBS)

Representative annual study among new car buyers (max. 6 months after purchase, registrations from 9/2023 - 8/2024) collecting data on satisfaction with recently purchased car, sales service, brand loyalty, market structure, and consumer characteristics.

Brand KPIs Definition:

Brand loyalty rate:

Share of previous brand owners who bought a new car model of the same brand again

$$\text{VW brand loyalty rate} = \frac{\text{New car buyers who purchased VW and owned VW as previous car}}{\text{Respondents who owned VW as previous car}} \%$$

Brand consideration rate:

Share of brands of all main alternative car

Brand conquest rate:

Share of conquered customers of all new customers the brand potentially could have won (replacers coming from other brands, additional car buyers, first time buyers)

$$\text{VW brand conquest rate} = \frac{\text{New car buyers who purchased VW} - \text{New car buyers who purchased VW and owned VW as previous car}}{\text{Total new car buyers market} - \text{Respondents who owned VW as previous car}} \%$$

Migration balance:

Balance (sale units) of won customers (gained from other brands) and lost customers (previous brand owners not buying the brand again)

NCBS Study Description

	Title	NCBS 2024 Full Year China
	Purpose of the study	Reliable quantitative data on the market of new passenger cars, structural changes and their determinants as well as surveying customer behavior and satisfaction.
	Sample definition	83,344 new car buyers, who owned their car for 6 to 32 weeks.
	Car delivery period	Cars delivered between September 2023 and August 2024
	Fieldwork period	January 2024 – December 2024
	Methodology	F2F interviews/ manufacturer-supplied addresses & F2F interviews/ street recruitment
	Type of study	Annual study
	Weighting	The interviews were weighted according to sales figures in the sales period
	KPIs	• All percentages reported without decimal places – except for the brand conquest rate (one decimal place) • All Ø-satisfaction scores reported with one decimal place • Rankings based on reported scores, brands with identical scores occupy the same rank (ordered alphabetically) • Results (scores and ranks) are shown for n>=50 only (Model level: n>=30). • Sample sizes < 100 are indicated as "small base"/ "tendency only" • No ranks for the satisfaction and recommendation KPI's are shown for differently recruited brands with n < 150.

Source: NCBS China (Brands Overall) 2024

NCBS China 2024FY Overview – Total Market

- **VW brand** delivers **steady performance** in **product satisfaction** (8.5) and **dealer satisfaction** (8.6), while **brand loyalty rate** (19%→23%) has increased.
 - **FAW-VW VW** shows **stable performance** in product satisfaction (8.5) and dealer satisfaction (8.6), it's brand loyalty shows **upward tendency**(12%→16%).
 - **SVW VW** has **maintained consistency** in product satisfaction (8.5), dealer satisfaction (8.6) and brand loyalty (13%).
 - **VW import** shows **big drop** at dealer satisfaction, e.g. sales staff service attitude, unprofessional test drive service, complex handover process with long waiting time.

- **Audi brand** keeps **stable** on **product satisfaction** (8.6), and shows **increase** on **dealer satisfaction** (8.5→8.7) due to improvement on online website & store, the sales staff competence, professional test drive service and delivery service.
- **Audi brand loyalty** also shows **recovery** (25%→31%), but still has gap with two key competitors (BMW 44%, Mercedes 43%).
 - **FAW-VW Audi** shows **stable product satisfaction**(8.6), delivers **an increase on dealer satisfaction** (8.5→8.7) and **brand loyalty** (18%→22%).
 - **SAIC Audi** shows a **minor fluctuation on product satisfaction**(8.6→8.5) and **increase on dealer satisfaction** (8.5→8.6).

- **Porsche** keeps the **leading position** on **product satisfaction** (8.7) and **dealer satisfaction** (8.8).

- **JETTA** shows **slight decrease** on the **product satisfaction** (8.5→8.4), while **the dealer satisfaction** has **increased a little**(8.4→8.5).

NCBS China 2024FY Overview – BEV Market

(N=1331)

ID.3 = 536
ID.4 = 594
ID.6 = 151
ID.7 = 50

- VW shows increasing tendency on **product satisfaction** (8.4→8.5) and **dealer satisfaction** (8.5→8.6), which are better than market average, and catch up with the **key competitors** BYD and XPENG.
- Product satisfaction improves in **good performance of suspension, the interior quality & material** and **accuracy of predict e-range remaining**.
- Dealer satisfaction increases in **professionalism of sales staff** and **delivery experience**.
 - **FAW-VW VW** and **SVW VW** both show increase tendency on both product satisfaction (8.4→8.5) and dealer satisfaction (8.5→8.6).
- Top purchase reasons of VW BEVs are **exterior styling, brand reputation** and **handling**. Top rejection reasons are **interior roominess, exterior styling, interior design and equipment level**.

(N=221)

Q2 e-tron = 1
Q4 e-tron = 120
Q5 e-tron = 93
e-tron = 7

- Audi shows increase tendency on **product satisfaction** (8.4→8.5) driven by higher satisfaction of **driving dynamics including acceleration, sportiness and maneuverability**.
- Significant improvement is observed on **Audi's dealer satisfaction** (8.2→8.6) in majority of customer touchpoints, which traces closely **behind Tesla** and **NIO**. **Key improvement areas include better experience of website, trade-in service with attractive subsidy and visit convenience with more dealers of SAIC Audi**.
 - **FAW-VW Audi** shows increase tendency on **product satisfaction** (8.4→8.5) and strong momentum in **dealer satisfaction** (8.2→8.6).
 - **SAIC Audi** shows increase tendency on **product satisfaction** (8.4→8.5) and leap in **dealer satisfaction** (8.3→8.6).
- Top purchase reasons of Audi BEVs are **exterior styling, brand reputation** and **handling**. Top rejection reasons are **exterior styling, equipment level and interior design**.

NCBS 2024FY China Market Update

Total Market - Trend Analysis (1/5)

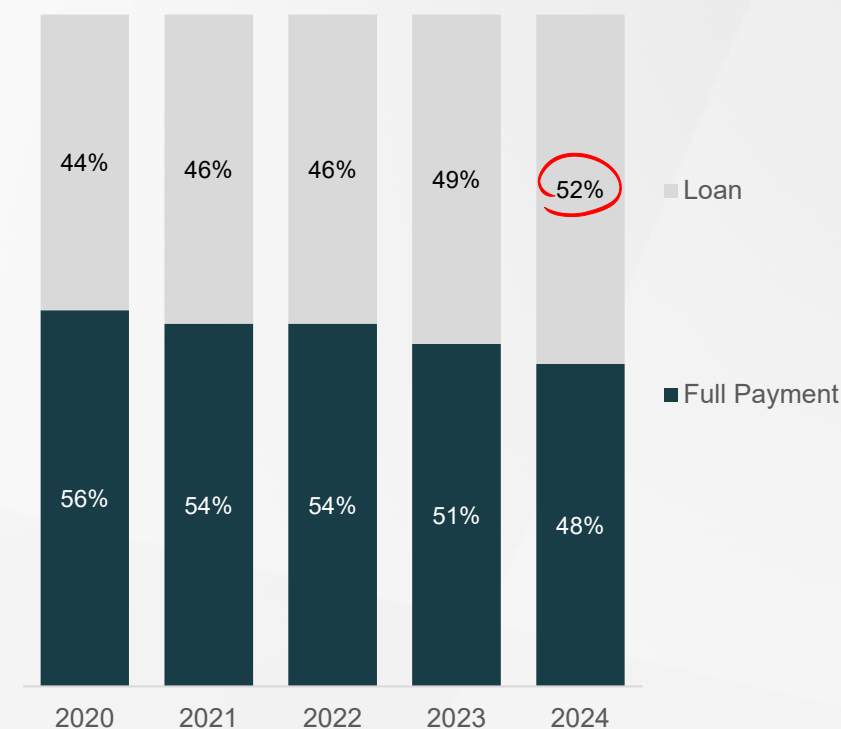

The share of replacers and additional car buyers is increasing with more and more customers paid by loan.

Type of Buyer

Payment

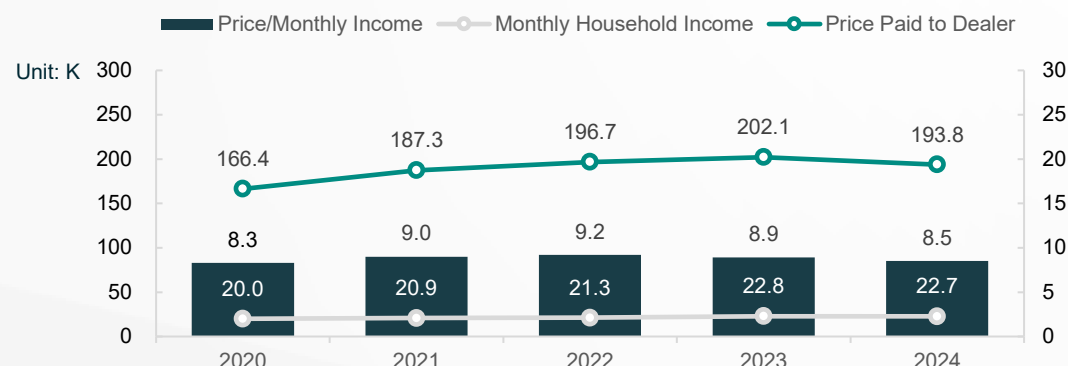

Total Market - Trend Analysis (2/5)

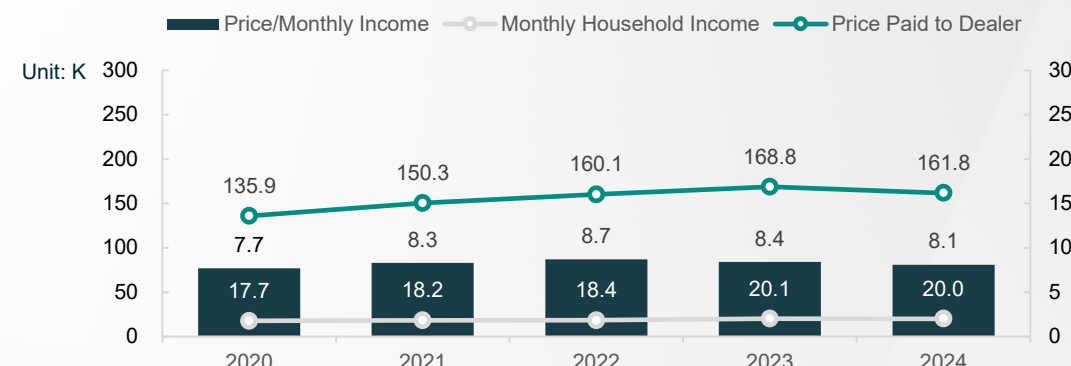

Overall price paid to dealer is decreasing in 2024 due to price war and more cautious consumption, while customers' affordability is increasing.

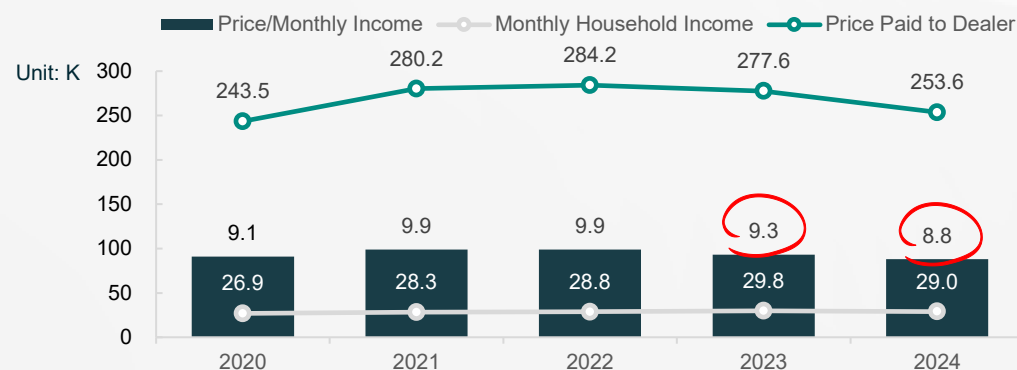

Total

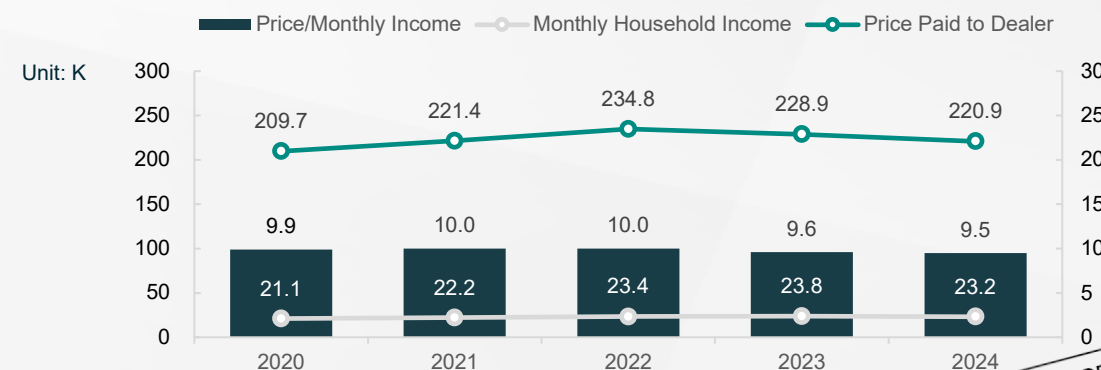

First car in household

Bought as additional car

Replacers

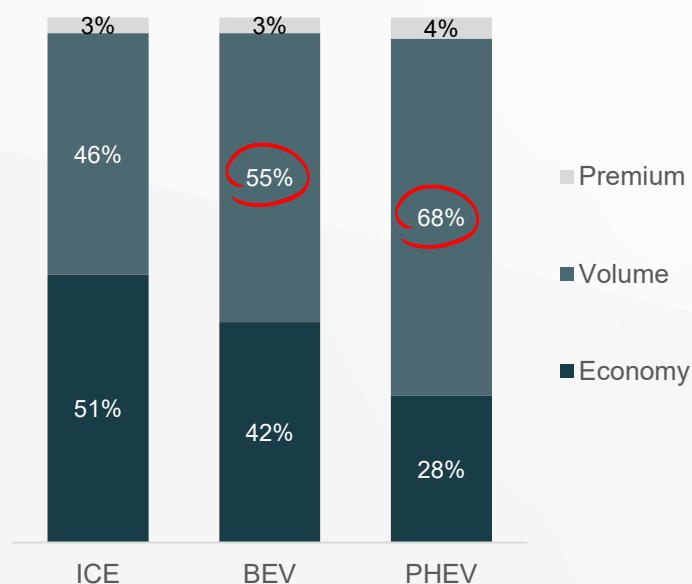

Total Market - Trend Analysis (3/5)

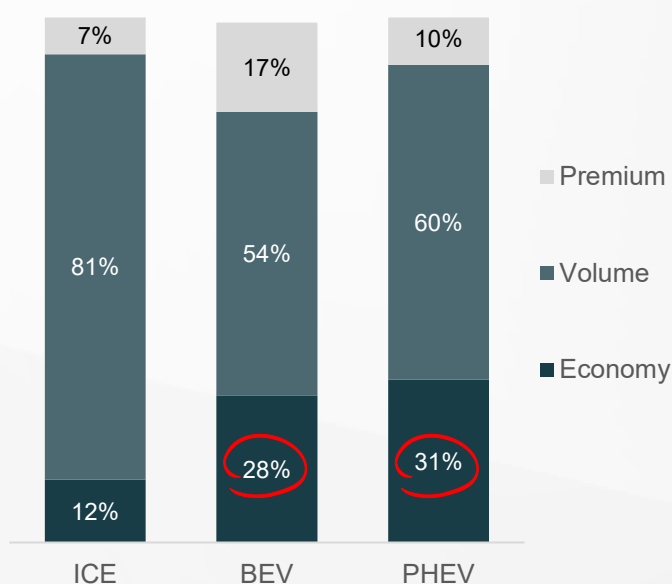

NEV buyers show more flexibility in choosing different brand categories.

Brand Indicator of Main Alternative Car

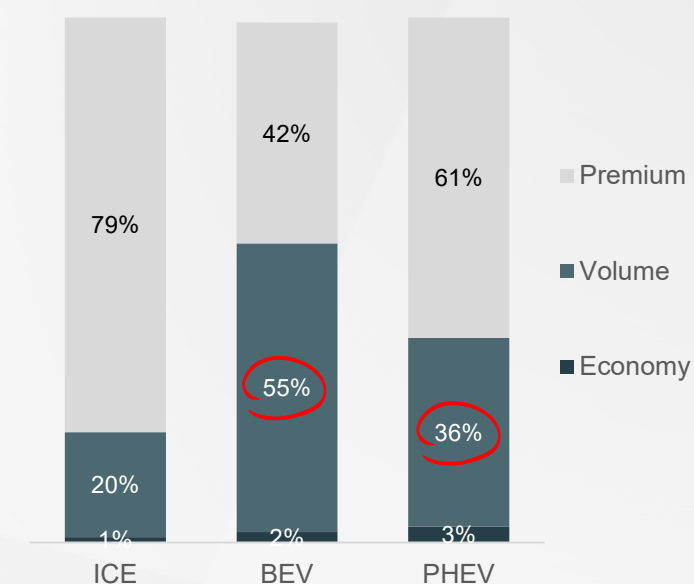

Economy Owners

Volume Owners

Premium Owners

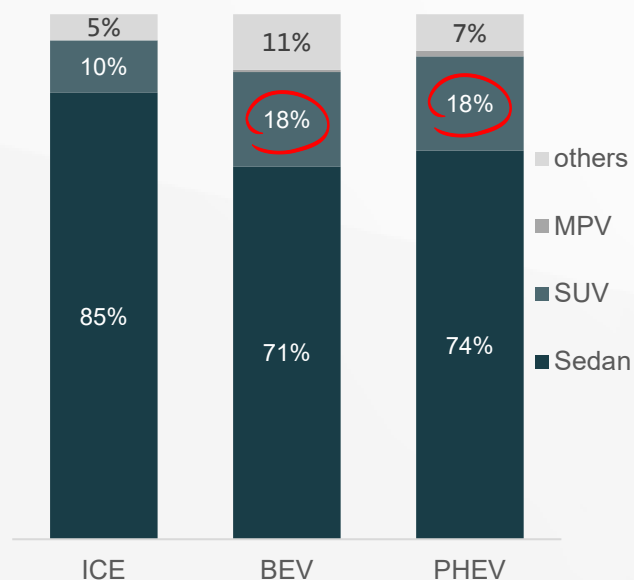

Total Market - Trend Analysis (4/5)

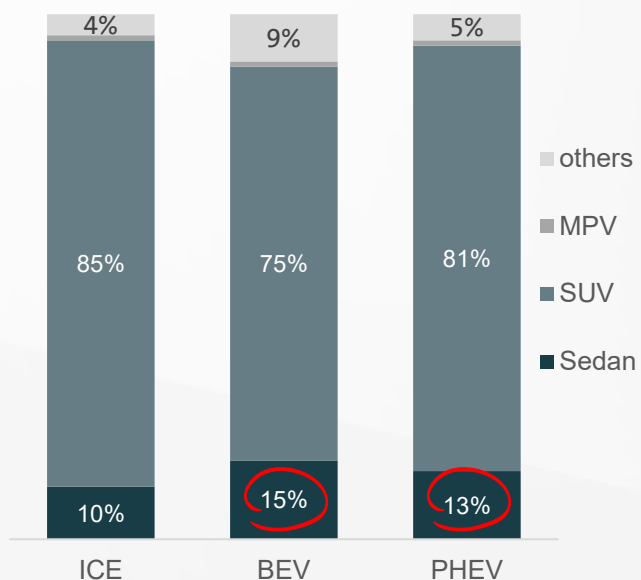

NEV customers also shows higher cross-consideration of different body types, esp. for BEV MPV buyers

Body Type of Main Alternative Car

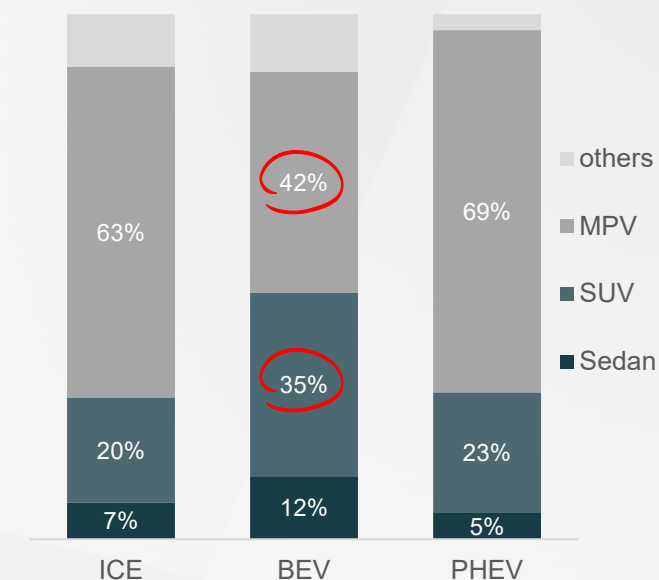

Sedan Owners

SUV Owners

MPV Owners

NEV Market Model Purchase Reasons

Both BEV and PHEV customers pay more attention to equipment level and new tech.

BEV Model Purchase Reasons Top 10 (%)

2024 Ranking			2020 Ranking	24 vs. 20 Δppt
1	Exterior styling/ appearance	40%	1	+1%
2	Equipment/New technology	15%	4	+4%

- Overall seating comfort:**
 - Insufficient amount of support at the lower-back area
 - The rear seats sitting position is too upright
- Easy to use inf. & entertainment system inc. in-car apps:**
 - Since processing chips are outdated, which often leads to system randomly crashing, long responsive time
 - Voice control often fails to understand commands
- Features of inf. & entertainment system inc. in-car apps:**
 - Limited number of APPs are supported by the system
- Integrated navigation system:**
 - In-car navigation has bad signal
 - Taking too long to calculate route and arrival time
 - Lacking regular map updates

Score

- Value for money:**
 - The interior has a strong sense of plastic, and the sense of luxury and sophistication is insufficient
- Roadholding:**
 - When driving at high speed, the sideways tilt is obvious when changing lanes quickly or avoiding in an emergency
 - When accelerating rapidly, the front end rises
- Easy to read and use instr./controls/displays:**
 - The lack of physical buttons on the center screen tends to distract the driver's attention
- Integrated navigation system:**
 - Map data not updated in time, inaccurate positioning
 - Route planning is not reasonable
- Smartphone integration/ connectivity:**
 - No wireless link support
 - Not compatible with some Android phones

Score

- Ease of entry into & out of car:**
 - Convenient chassis height, especially for women and children
- Overall seating comfort:**
 - Easy to adjust to the owner's desired angle
 - Good seat material, not easy to deform
- Quietness when driving:**
 - Tire noise become quite noticeable at high speeds
- Interior styling:**
 - The interior design is overly conservative, lacking innovativeness and popular fashion elements
- Quality of interior:**
 - Excessive use of plastic interior parts gives a cheap feel

Score

Accessibility & comfort of third row seats:

- Manually adjusted second-row seats complicated the process of the third row's entry and exit(Q6)

Value for money:

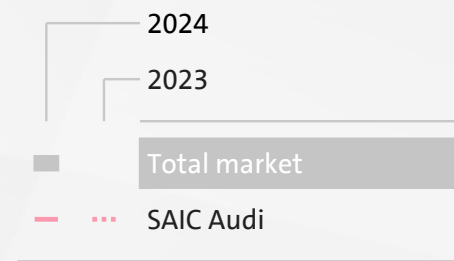

- First-year residual value rate is lower than FAW-Audi models

Smartphone integration/ connectivity:

- CarPlay connection is not stable

Luggage capacity:

- Insufficient size of trunk opening for loading large cargo (A7L/ Q5 e-tron)

⁵ Street recruited Worse than 2023 performance and gap≥0.3

Score

Quality of ride:

- The suspension is comfortable

Overall offroad performance:

- Torque delivery is smooth
- Ground clearance is ideal

Maneuverability:

- Turning circle is small

Easy to use inf. & entertainment system inc. in-car apps:

- The processing chips in E-tron models are outdated, causing lags and crashes

Features of inf. & entertainment system inc. in-car apps:

- Limited third-party APPs
